The first result is this simple and straightforward guide I wanted to enable SSL on the connections to my MySQL server that I installed in a Windows machine, so I googled 'use ssl mysql windows'.. || Ok, so SSL is available but DISABLED for now (if it had a 'NO' in the value, SSL was not enabled for our binaries, we would need to look for new ones).. Our purpose is to configure MySQL first so that it shows a 'YES' in those values.. You can also see if SSL is being used for the current connection by issuing a status query: mysql> status ----- mysql Ver 14.
